## OPTIC

### Stem Pendant

Exclusively from Sirius Lighting – an innovative concept in high efficiency glass reflectors. 18 optical coatings on a crystal reflector gives the OPTIC superior illumination capabilities. 86% reflectance casts a crisply defined beam with sharp edges and no lamp striations.

Glass reflector has a “silver” finish when not energized and takes on an iridescent blue transparency when lit.

Lamp holder is finned for heat dissipation.

Fixture is milled from solid brass and finished in hand-polished chrome, platinum or 24K polished gold plate.

Three different mounting options:

**SL:** Standard rail mount. Allows the fixture to be conveniently mounted anywhere along the rail system up to the maximum capacity of the circuit.

**SP:** Mono-point pendant for remote transformer.

**SPT:** Mono-point with a built-in 120/12V, 60W electronic transformer in the canopy.

These choices allow for unlimited placement possibilities in lighting design.

Rated for 12 or 24 volts.

Available in two lengths: 4-1/4" (110mm) and 21-1/2" (550mm); 2-1/2" (63mm) diameter.

Lamp: (1) 50W (max.) T5 Xenon Bi-Pin Lamp, GY6.35 base, clear or frosted with a vertical filament.

Fixture is covered by one year replacement guarantee after date of purchase.

cULus listed. New York City Approved.

Example Order:   -

#### Mounting

**SL** - Rail Mounted Fixtures

**SP** - Pendant Model for Remote Transformer

**SPT** - 120V Pendant Series with Built-In Step-Down 60W Electronic Transformer 120/12V

#### Fixture

**0100** - 4-1/4" (110mm)

**0500** - 21-1/2" (550mm)

#### Finish

**C** - Polished Chrome

**G** - 24K Polished Gold

**PL** - Platinum
