

The American Recovery and Reinvestment Act of 2009

2012

In February 2009, The American Recovery and Reinvestment Act of 2009 (ARRA) was signed into law. To qualify for funding in this program, the ARRA requires that products used in these projects meet certain criteria.

While this Act contains many complicated guidelines, the current instruction is that there are three primary criteria:

Level 1: The products must be manufactured in Free Trade Agreement countries

Level 2: The products must be manufactured in the United States of America

Level 3: The products must be manufactured in the US with 50% components by cost from the US

Con-Tech Lighting has reviewed the requirements of the Buy American clause of The American Recovery and Reinvestment Act of 2009 (ARRA). **Based on the primary criteria, many of our products are in compliance with this Buy American clause of the ARRA.** These products are in stock and ready to ship. We are eager to provide these products for any stimulus projects that you may have the opportunity to bid on.

Following is a complete list of lighting products that are compliant with the Act. Please consult your RSM or our Quotations group for more details to assist with your projects.
